

# Mentorship Update Instructions

**\*Important:** Before updating to v1.6, ensure you're on v1.5 (check in your admin panel footer). If you're using an older version, contact our support at [codericks.envato@gmail.com](mailto:codericks.envato@gmail.com) to get the previous versions.

## 1. Download & Extract

- **Download** the latest script and extract it on your computer.
- Open **mentorship\_v1.6 > updates > v1.6 > upload\_files**. You will find **2 zip** files inside:
  - **application.zip**: Upload & extract this into your project's **application** folder.
  - **assets.zip**: Upload & extract this into your project's **assets** folder.

## 2. Upload “Updates” Folder

- Open the latest downloaded script and upload this “**updates**” folder on your server project root folder and replace.

## 3. Database Update

- In your browser, go to: [www.yourdomain.com/updates/v1.6](http://www.yourdomain.com/updates/v1.6)
- Enter your item purchase code & existing database credentials to complete the update. (You will find your current DB credentials on application > config > database.php file)

## 4. Multilingual Users (Optional)

- If using multiple languages, log in as Admin, go to the Language section, and translate any new values “**admin**”.
